PROFESSIONAL SUMMARY

I'm a Backend Developer with almost 2 years of hands-on experience building scalable services in Golang and Java. My background in Mathematics from Universitas Negeri Malang, which I now apply to designing clean, efficient RESTful APIs using Gin, GoFiber, and Spring Boot. I've built backend systems for school information platforms, cooperative (koperasi) web & mobile apps, and an Umroh service website each one taught me something new about writing readable, maintainable code. I enjoy turning complex requirements into simple, working solutions, and I'm always looking to grow my skills in backend architecture and system design.

WORK EXPERIENCE

Intern Golang Backend Developer | PT. Insan Cendekia Nusantara February 2025 – June 2025
Malang, Indonesia

- Built a School Information System REST API using Golang (Fiber framework)
- Designed and managed relational database schemas using PostgreSQL
- Collaborated in a team environment using Git/GitHub version control
- Wrote and tested API endpoints using Postman

Golang Backend Developer | PT. Ranajaya Citaprasada Thani Indonesia June 2025 – Present
Malang, Indonesia

- Built a System umrah management and cooperate system System REST API using Golang (Gin framework)
- Designed and managed relational database schemas using PostgreSQL
- Collaborated in a team environment using Git/GitHub version control
- Wrote and tested API endpoints using Postman

TECHNICAL SKILLS

Languages: Go (Golang), Java

Backend: REST API, Gin, Fiber

Database: PostgreSQL, MySQL

Tools & DevOps: Git, GitHub, Docker, Docker-Compose, Postman

Soft Skills: Teamwork, Leadership, Problem Solving, Time Management

EDUCATION

Bachelor of Mathematics (S1) | Universitas Negeri Malang September 2022 – May 2026

Science Major (IPA) | SMAN 19 Kota Bekasi July 2019 – June 2022

ORGANIZATIONAL EXPERIENCE

Head of the Legislation and Law Committee | Dewan Mahasiswa FMIPA UM January – Desember 2025

Vice President | Himpunan Mahasiswa Departemen Matematika UM January – Desember 2024

PROJECTS

School Information System | Golang, Fiber, PostgreSQL February – May 2025

- Developed a full-featured school information REST API during internship
- Handled student data management, academic records, and reporting endpoints
